Materassi

Mattresses - Matelas

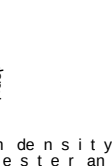

Materassi

Mattresses - Matelas

Professionale Boxato

Materasso dal cuore in molle biconiche ad alta densità e 2,4 mm di spessore. L'altissimo comfort di questo materasso è dovuto al numero di molle biconiche (176 per il singolo - 352 per il matrimoniale) e alla struttura boxata in poliuretano, che permette un perfetto adattamento al corpo umano.

PROFESSIONAL BOXED
Mattress with core made of breakthrough-proof phosphated biconical steel springs 2.4 mm, equipped of a boxed structure, with high density polyurethane foam perimetral reinforcement.
The very high comfort of this mattress is due to the high springs number (n° 200 the single - n° 400 the double) that allows the support surface to perfectly fit to the human body.

PROFESSIONNEL BOXÉ
Matelas en cœur de des ressorts anti-défoncement biconiques en acier Bonnel phosphaté à 2,4 mm et équipé d'une structure boxée avec renfort sur le périmètre en mousse de polyuréthane. Le confort très élevé de ce matelas est obtenu grâce au nombre élevé des ressorts (n° 200 pour le simple, n° 400 pour le double) qui permet à la surface de soutien de s'adapter parfaitement au corps humaine.

Materasso incluso

Baby M aterasso

Materasso dal cuore poliuretano a cella ad alta densità (35HR) aperte intercomunicanti che conferiscono maggiore elasticità e traspirabilità al materasso. L'alta densità permette di distribuire in modo uniforme la pressione esercitata dalle varie parti del corpo, permettendo un sostegno ottimale alla colonna vertebrale.

Baby Mattress

Mattress with core made of high density polyurethane foam (35HR), made of open communicating cells that allow a higher elasticity and breathability. The high density allows to distribute uniformly the body pressure, allowing an optimal support of the spine.

Matelas Enfant

Matelas en coeur de de polyuréthane haute densité (35HR), réalisé en cellules ouvertes intercommunicantes qui donnent une plus grande élasticité et la respirabilité. La densité élevée permet de répartir uniformément la pression du corps, ce qui permet un soutien optimal de la colonne vertébrale.
